

## **Community Capacity-Building Funding Opportunity Q&A**

Last Updated 1/27/2020

**We serve more than just the eligible county and since our office is located outside of that county, will we still be eligible!?**

As long as you are including the eligible county you would be eligible to apply. There isn't a requirement that the fiscal agent office has to be in that county as long as you feel you would be able to make the necessary connections to implement the program. Just make sure you provide ample detail within the application for the review committee to have a clear picture of your community.

**Does the focus need to be solely on opioid abuse?**

This funding opportunity is aimed at preventing, reducing or responding to substance abuse, overdose and suicide.

**Do we need to have a fiscal agent?**

Yes, applicants must be able to identify a fiscal agent who has a valid tax identification number and be able to produce a W9 and Proof of Insurance.

**How many years is this funding for?**

This is a 2-year funding opportunity, but year 2 funding is contingent upon available funds and awardee progress and budget spending.

**Will this opportunity be open to neighboring communities? Curious if you do not receive a certain number of applications if you plan to open to other counties?**

At this time the funding opportunity is only open to the 13 identified counties. If the submission deadline passes and there are insufficient applications the program will reevaluate the funding opportunity at that time.
